Trouble Shooting

The LED light units used in this aquarium are designed to last up to 5 times longer than conventional light tubes. All LED lights are made up of multiple LEDs and occasionally individual LEDs can break down as with all LED devices. The effectiveness of your LED light unit will not degrade as quickly as conventional light tube output would over a period of 6 months.

LIGHT DOES NOT WORK

1. Ensure the light unit is firmly connected to the power supply unit and the switch is in the “on” position.
2. Ensure the power supply unit is connected to the power outlet and the outlet is switched on.
