### Notes, Hints & Tips:

- Remember, all fish will grow. When selecting fish, make judgements based on the maximum size the fish will grow, not simply based on the size of the fish at the store.
- Ensure there is sufficient water in the aquarium. When the water level drops due to evaporation, the return pump will begin to suck air, resulting in fine bubbles being distributed through the aquarium. When topping up evaporated water, always use dechlorinated tap water or suitably filtered water.
- Installation upon uneven flooring will result in poor distribution of weight. Damages to the aquarium, cabinet or equipment and damages caused by leaks due to improper or uneven installation are not covered by the guarantee with this product.

### Warning and Disclaimers:

- Read and follow all the instructions, even if you feel you are familiar with the product, and find a place to keep the instructions handy for future reference. Your attention is drawn particularly to the sections concerning "IMPORTANT SAFEGUARDS" and "GUARANTEE CONDITIONS". Please ensure you retain your original purchase receipt in the event that guarantee service is required.
- Do not use the appliance for reasons other than the intended use. The use of attachments that are not recommended or sold by the manufacturer may cause the product to be unsafe and should be avoided.
- All products are supplied with fitted plugs. This plug should not be tampered with in any way or removed. Removal or tampering with the plug invalidates our guarantee offered with this product.
