The Aqua One Filter Sock acts as a mechanical pre-filter for your sump. The 150 micron mesh will trap fine particles coming from the feed pipe before they settle in the sump, or are reintroduced into the aquarium. This provides healthier aquatic life, reduced sump detritus, improved water clarity and quality.

Suitable for: Marine

Features & Benefits:

- The 150 micron mesh traps particles as small as 0.15mm resulting in improved water quality and clarity.
- Includes mounting bracket with screw clamp fixture.
- Suitable for glass up to 10mm.
- Suitable for feed pipe up to 50mm.
- Replacement Filter Socks are available.
- Prevents detritus, uneaten food and microalgae entering the sump.

Price & Technical Information

Code	Description	Inner	Carton
