

## Aquarium Filter Wool

**A**qua One Aquarium Filter Wool is a high quality mechanical and biological filtration media used to remove waste and particulates from the aquarium.

Filter wool provides a place for beneficial bacteria to colonise and helps keep water clean.

**Suitable for: Coldwater, Tropical & Marine**

### Features & Benefits:

- Available in three sizes
- Removes waste and particulates
- Suitable for a range of filter systems
- Removes smaller particles than sponge filter media

### Notes, Hints & Tips:

- For optimum filtration, use in conjunction with **Aqua One Premium Carb (Activated Carbon) #10421 - 10423** to control harmful ammonia.
- Cut wool to size and lightly pack wool into filter. Change wool as necessary and regularly.
