

MagiClean 1.9m Cleaning Brush

No more dirty pipes and hoses! Aqua One MagiClean does the job for you. Clean off the dirt and slime deposits from inside your hoses and filter pipes, reducing the likelihood of water contamination and unsightly algae deposits, ensuring you have a sparkling clean aquarium.

Suitable for: Goldfish, Tropical & Marine

Features & Benefits

- **1.9 metre long flexible nylon handle**
- **Firm nylon brush**
- **Makes cleaning long hoses easy**
- **Provides a superior clean result**

Product Price & Technical Specifications

Item Code	Description	Colour	Length
20130	Hose Cleaner Brush MagiClean 1.9m	White	1.9m

Notes, Hints & Tips

For best results:

1. Flush the hose you intend to clean with hot water to loosen the deposits.
2. Feed the tail end of the cleaner through the hose.
3. Once the tail end passed through the hose, pull the hose cleaner through to clean the hose. Try to have the hose as straight as possible, as this will reduce the resistance on the cleaner making it easier to pull through the hose.
4. After use, clean the brush under tap water to remove any excess deposits from the brush.
